25X1A6a

1. There are signs that the Russians are establishing depots in the area of the triangle Zwickau (K-34) - Chemnitz (K-65) - Altenburg (K-37). The indications are as follows:
 - a. Barns and empty factory premises have been requisitioned in various villages.
 - b. Stabling facilities have been inspected at the larger farms in the Wyhra Valley and notes have been taken of the number of horses which could be accommodated.
 - c. Food supply dumps have been set up in some villages.
2. Russian hospitals also have been opened in this area, though so far they are handling very few cases. The hospital already reported in the castle at Waldenburg (K-46), where a women's branch has now been opened, is only working at twenty-five percent of capacity. There are about ten doctors on the staff.
3. A medical commission recently arrived in Wolkenburg (K-46) in the Mulde Valley in order to inspect the castle there for its suitability as a hospital.
